EDUCATION

Some University	*BS Computer Science*	Some City, ST	Expected: May 2017

WORK EXPERIENCE

Some Company	*Software Engineer Intern*	Some City, ST	Jun 2016 — Aug 2016

- Improved search and autofill components to include subdomains.
- Refactored and simplified APIs to use existing components and minimize code duplication.
- Fixed regressions and improved testing to prevent them in the future.

Some Company	*Coding Advisor*	Some City, ST	Dec 2015 — May 2016

- Created a JavaScript project in the new JS course for premium members.
- Taught new coders how to avoid bugs and how to go through the process of fixing existing ones.
- Reviewed general programming topics with students and provided assistance for lessons in Java, HTML, CSS, JavaScript, and Ruby.

Some Company	*Software Developer Intern*	Some City, ST	Jun 2015 — Nov 2015

- Wrote an API that allowed CRUD operations to be used for accessing and manipulating data involving current departments/groups/teams at company.
- Created a UI for admins that used the aforementioned API to automate the process of syncing departments/groups/teams on the site to relevant databases.
- Improved the company site by using cookies to display tailored web-content.

Some Company	*Web Developer Intern*	Some City, ST	Jan 2015 — Jun 2015

- Improved existing web pages by migrating inline-styling to external CSS files, and adding cross-browser compatibility.
- Created front-ends with HTML, CSS, and JavaScript and utilized the jQuery UI library to create responsive widgets.
- Debugged original code base as the sole developer on the team and created a standard for web part development for future employees.
